# British Journal of Mathematical and Statistical Psychology

**Editor:** Pat Lovie (University of Keele)

**Editorial Board:**

David Bartholomew (London School of Economics)
Marcel Croon (Tilburg University)
Raphael Gillett (University of Leicester)
Harvey Goldstein (University of London)
Lawrence Hubert (University of Illinois at Urbana-Champaign)
Christoph Klauer (University of Bonn)
Chris Leach (Wakefield & Pontefract Community Health NHS Trust)
Philip Levy (University of Lancaster)
Sandy Lovie (University of Liverpool)
R. Duncan Luce (University of California, Irvine)
Sandy McRae (University of Birmingham)
Jacqueline Meulman (Leiden University)
Philip T. Smith (University of Reading)

**Book Reviews Editor:**

Ranald R. Macdonald (University of Stirling)

**Statistical Software Reviews Editor:**

Diana Kornbrot (University of Hertfordshire)

# Contents of Volume 54

**Part 1 May 2001**

1 The analysis of repeated measures designs: A review
*H. J. Keselman, James Algina and Rhonda K. Kowalchuk*

21 Some Mantel-Haenszel tests of Rasch model assumptions
*Tom Verguts and Paul De Boeck*

39 Inferences about correlations when there is heteroscedasticity
*Rand R. Wilcox and Jan Muska*

49 Three-mode models for multivariate longitudinal data
*Frans J. Oort*

79 Using Johnson's transformation and robust estimators with heteroscedastic test statistics: An examination of the effects of non-normality and heterogeneity in the non-orthogonal two-way ANOVA design
*Wei-Ming Luh and Jiin-Huarng Guo*

95 A note on covariance structure analysis methods for testing invariance of reliability and stability in multi-wave, multi-indicator models
*Tenko Raykov*

103 Modelling dissimilarity: Generalizing ultrametric and additive tree representations
*Lawrence Hubert, Phipps Arabie and Jacqueline Meulman*

125 A computationally efficient method for obtaining standard error estimates for the promax and related solutions
*Yiu-Fai Yung and Kentaro Hayashi*

139 A minimax procedure in the context of sequential testing problems in psychodiagnostics
*Hans J. Vos*

161 Effect of outliers on estimators and tests in covariance structure analysis
*Ke-Hai Yuan and Peter M. Bentler*

177 Conditional local influence in case-weights linear regression
*Wai-Yin Poon and Yat Sun Poon*

193 Book reviews

199 Editorial acknowledgement

**Part 2 November 2001**

201 Criticality of predictors in multiple regression
*Razia Azen, David V. Budescu and Benjamin Reiser*

227 Transformation works for non-normality? On one-sample transformation trimmed $t$ methods
*Wei-Ming Luh and Jiin-Huarng Guo*

237 Bayesian estimation and test for factor analysis model with continuous and polytomous data in several populations
*Xin-Yuan Song and Sik-Yum Lee*

265 Individual differences in paired comparison data
*Ulf Böckenholt and Rung-Ching Tsai*

279 Misspecifying latent class models by mixture binomials
*Anton K. Formann*

293 A nonlinear congeneric model for continuous item responses
*Pere J. Ferrando*

315 Estimation of congeneric scale reliability using covariance structure analysis with nonlinear constraints
*Tenko Raykov*

325 Evaluation of a pseudo-$R^2$ measure for panel probit models
*Martin Spiess*

335 On the direct products of measurement structures
*Ching-Yuan Chiang*

347 Common factor models of validity and reliability for use with ordinal data in $k \times k$ tables
*D. A. Grayson*

367 Seriation of asymmetric matrices using integer linear programming
*Michael J. Brusco*

377 Book reviews

383 Statistical software for microcomputers
